1 [High performance multidimensional analysis of large datasets](#)

Sanjay Goil, Alok Choudhary

November 1998 DOLAP '98: Proceedings of the 1st ACM international workshop on Data warehousing and OLAP

Publisher: ACM

 Full text available: [pdf\(856.78 KB\)](#) Additional Information: [full citation](#), [references](#), [cited by](#), [index terms](#)

2 [Performance and fluid simulations of a novel shared buffer](#)

[management system](#)

Krishnan Kumaran, Debasis Mitra

January 2001 ACM Transactions on Modeling and Computer Simulation (TOMACS), Volume 11 Issue 1

Publisher: ACM

 Full text available: [pdf\(229.12 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

We consider a switching system that has multiple ports that share a common buffer, in which there is a FIFO logical queue for each port. Each port may support a large number of flows or connections, which are approximately homogeneous in their statistical ...

Keywords: buffer management, fluid simulations, virtual partitioning

3 [A hybrid systems modeling framework for fast and accurate](#)

[simulation of data communication networks](#)

Stephan Bohacek, João P. Hespanha, Junsoo Lee, Katia Obraczka

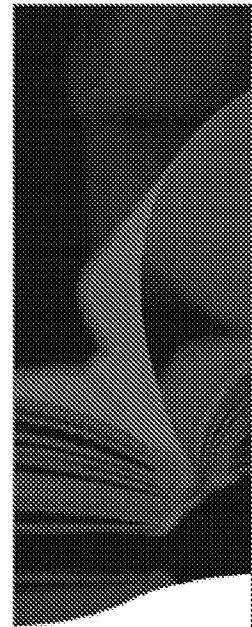

June 2003 ACM SIGMETRICS Performance Evaluation Review, Volume 31 Issue 1

Publisher: ACM

 Full text available: [pdf\(559.41 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

In this paper we present a general hybrid systems modeling framework to describe the flow of traffic in communication networks. To characterize network behavior, these models use averaging to continuously approximate discrete variables such as congestion ...

Keywords: TCP, UDP, congestion control, data communication
